

## **Interact Club – President**

I have had the privilege of serving as the Interact Club President, and my term has been filled with meaningful experiences and impactful community service. Throughout the year, our club has organized and participated in a wide range of activities aimed at improving the well-being of those around us. We successfully conducted blood donation camps, mammography camps, and dental camps, providing essential health services to people who needed them most. In addition, we carried out tree plantation drives and several other environmental initiatives to promote sustainability and create a greener future.

Beyond these hands-on activities, our club also led multiple awareness campaigns aligned with important national and international days. These drives helped educate the community on various social, health, and environmental issues, fostering a sense of responsibility and collective action. Overall, my journey as Interact Club President has been incredibly rewarding, and I am proud of the positive difference our team has been able to make.
